

Same workload distributions (300 samples)

$T = 2200$ s; $E = 620$ kJ

95% confidence interval
Lower bound Mean Upper bound

Proposed

Shadow prices + stochastic DP

44.1%

Weight Greedy

Min cost + max weight

38.1%

Mean-workload Greedy

Min cost + max weight/cost

37.8%

Mean-workload DP

Shadow prices + mean DP

35.0%

Distribution-aware Myopic

Min cost + max expected reward

29.4%

Nearest Neighbor

Min cost + nearest task

28.1%
