
Same workload distributions (300 samples)
T = 2200 s; E = 460 kJ
95% confidence interval
Lower bound
Mean
Upper bound
Proposed
Shadow prices + stochastic DP
39.0%
Weight Greedy
Min cost + max weight
34.3%
Mean-workload Greedy
Min cost + max weight/cost
35.1%
Mean-workload DP
Shadow prices + mean DP
33.3%
Distribution-aware Myopic
Min cost + max expected reward
28.1%
Nearest Neighbor
Min cost + nearest task
27.1%
Rollout [30]
Min cost + sampled rollout
30.6%
IO [31]
Min cost + iterative orienteering
33.4%
ADAPT [32]
Min cost + adaptive IACS
29.5%
